

Product Information – Bridge Plugs

Elite Tubing Plug

General

Small, compact, and dependable, the Elite Tubing Plug is easily set via wireline. Setting force is maintained by a Ratcheting Lock Ring on top of the plug. Drilling out is easier due to the Lock Ring being removed at the beginning of the operation. Sufficient sand or cement must be dumped atop the plug to prevent damage from perforating shock.

Features/Benefits

- ♦ Rated at 400° F (Aflas) or 300° F (Nitrile).
- ♦ Tubing and casing sizes available from 2-3/8" to 3-3/8"
