Series 5010 Permanent Packer

General

The TTS Series 5010 Thru-Tubing Permanent Packer is a permanent drillable packer designed to be set in tubing sizes from 2-3/8" thru 4-1/2" O.D. It utilizes a proven slip and multi-durometer packing system. Its rated for 5000-psi differential at 300° F°. The Series 5010 Packer can be deployed and set on either coiled tubing (hydraulically), electric line and slickline.

Application

- ♦ Sand Screen Installations
- ♦ Cement Retainer
- ♦ Straddle Pack (Tubing Patches)
- ♦ Velocity String Hang-Off
- ♦ Thru-Tubing Gas Lift Installations
- ♦ Coil Tubing or E-Line Deployed Perforating Systems
