Product Information

TTS Series 5400 Rotary Blasting/Descaling

General

The TTS Series 5400 Rotary Blasting/Descaling Tool is a rotating wash tool designed to be deployed on Coiled tubing for Jet Blasting of production tubing or casing. The tool nozzles are designed to take advantage of maximum hydraulic horsepower and impact force while washing. The tool also feature a hydraulic braking system that slows the nozzle spinning to an optimum speed for blasting the inside tubing/casing walls. Available to accommodate all common production tubing sizes.

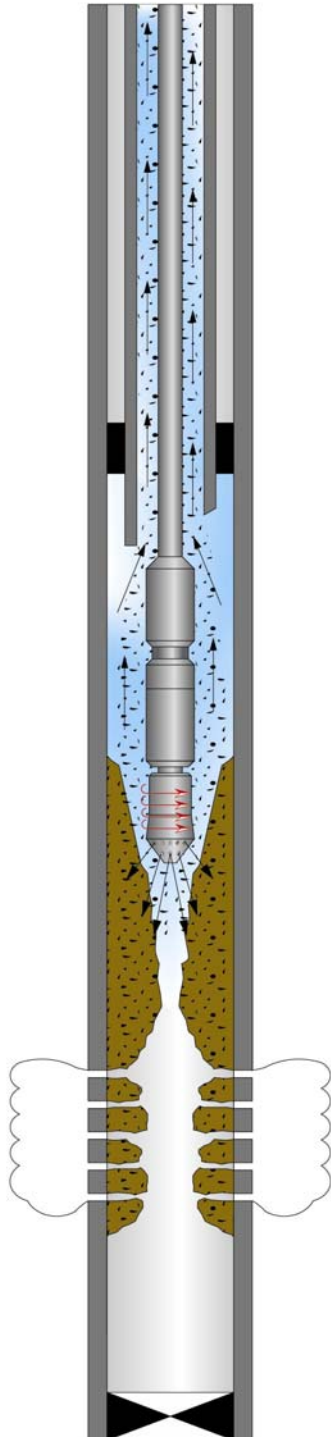

Application

- ♦ Removal of scales from tubing I.D.
- ♦ Removal of organic deposits from tubing I.D.
- ♦ Washing of hard sand or fill in tubing and casing

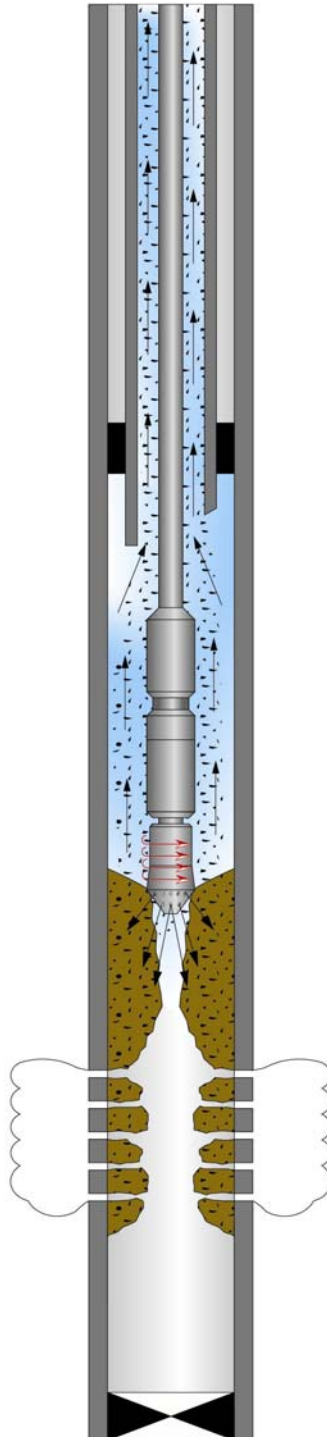

Rotary Jet / Impact Hammer Blasting Tool
